

William (Liam) Snow IV

mail@liamsnow.com | github.com/liamsnow | linkedin.com/in/william-snow-iv-140438169 | liamsnow.com

EDUCATION

Worcester Polytechnic Institute

Worcester, MA

BS in Electrical & Computer Engineering

MS in Computer Science

Aug 2022 — May 2026

SKILLS

- **Programming Languages:** Rust (2 years), Golang, C, C++, Java, C#, Python, TypeScript, JavaScript
- **Technologies:** REST, WebSockets, Multi-threading, Async/Await, SQL (SQLite, PostgreSQL, RDS), NoSQL (GC Datastore), Linux (Arch, Debian), Unix, Git, GitHub, CI/CD (GitHub Actions), Tokio, Axum, Actix, Dioxus, Leptos, Gin, Protobuf

PROJECTS

opensleep (113★) (liamsnow.com/projects/opensleep)

Nov 2024 — Present

- Developed open source firmware for the Eight Sleep Pod 3 in Rust
- Reverse-engineered two custom USART protocols, reimplemented using custom Tokio codec
- Adds Home Assistant integration (via MQTT), custom temperature profiles, remote configuration, presence detection, and privacy

igloo (liamsnow.com/projects/igloo)

Jan 2025 — Present

- Building open-source smart home platform in **Rust** as Home Assistant alternative; integrates ESPHome, HomeKit, MQTT with visual programming language for automations
- Built Entity-Component-System (ECS) model, allowing for strict component types while remaining extensible to new device types without core changes
- Implemented query engine achieving **>1 million queries/sec** throughput with 4µs average latency. Internally (without channel overhead) queries execute in an average of **200ns**.
- Built extensive code generation system producing Component enums, type conversions, aggregators, and Python bindings from TOML definitions
- Created custom IPC protocol with forward-compatible schema evolution using length-delimited Bincode over Unix sockets

WORK EXPERIENCE

Security Intern

Jun 2025 — Aug 2025

Cyera, Inc.

Remote

- Developed a security investigation summarizer Slack bot in Golang
 - Saves >100 hours a year of manual work by security engineers
 - Collects data from Slack and other sources and builds a report using AWS Bedrock in ~1 minute
- Made VM automation which automatically finds new CVEs across multiple security tools (Snyk, Upwind, etc.) and sends results over Slack
- Developed security news article downloader which automatically scrapes readable content from web pages and formats them into a NextJS article reader
- Made dashboard which displays security team's contributions to sales. Uses Atlassian Jira and Salesforce APIs in Golang

Software Intern

Jun 2023 — Aug 2024

Phreesia, Inc.

Remote

- Worked on a team to develop a complete rewrite of the Integrations software
 - Used .NET Core, Websockets, and REST APIs
- Developed Atlassian Confluence RAG chatbot to help users find answers and cite sources
 - Used Confluence API, OpenAI embeddings, ChromaDB, and LangChain

Software Intern

Jun 2019 — Oct 2020

Naval Postgraduate School

Monterey, CA

- Worked under Professor Ray Gamache for programming and assembling robots

- Programmed LIDAR, ultrasonic, radar, AHRS, and GPS sensors in LabVIEW
